ABOUT AUSMET

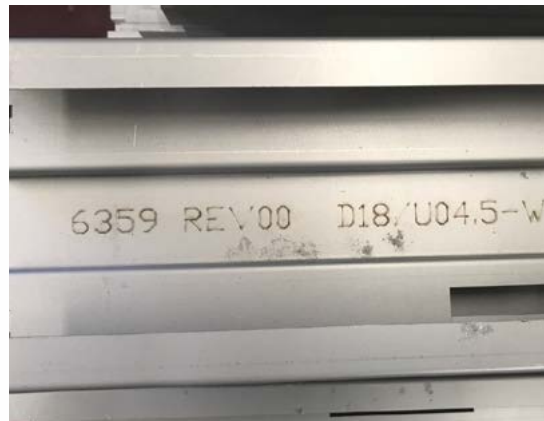

Ausmet Doorframes commenced operations in early 2019 with an experienced team of sales, estimating, operations and fabrication personnel.

Our modern manufacturing equipment and processes allow us to manufacture a suite of metal doorframe products with extreme accuracy.

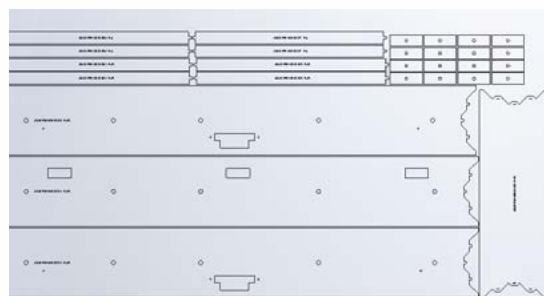

All of our commercial metal doorframes are individually drawn and checked in Autocad at the start of the manufacturing process. This allows us to eliminate any unforeseen manufacturing issues prior to the commencement of manufacture which streamlines the manufacturing process which results in extremely fast lead times.

LARGE AND UNUSUAL DOORFRAMES ARE PRODUCED WITH EASE (CAVITY SLIDER SHOWN)

DOOR NUMBERS ARE EMBOSSED ONTO THE METAL DOORFRAME

ALL OF OUR DOORFRAMES ARE DRAWN AND CHECKED IN AUTOCAD

COMMERCIAL METAL DOORFRAMES

Commercial metal doorframes are custom manufactured to suit various wall types, door sizes and specified hardware.

Modern Manufacturing Equipment

With our modern manufacturing equipment, we are pleased to announce that Ausmet's manufacturing limitations on commercial style doorframes are few.

As a reputable manufacturer of commercial metal doorframes it goes without saying that Ausmet offer a comprehensive range of profiles and configurations including transoms and mullions, four sided doorframes, cavity sliders, euroseal rebates and many more.

Our commercial metal doorframes are manufactured to receive any specified hardware. From electric strikers to overhead transom closers Ausmet's understanding of hardware is unparalleled.

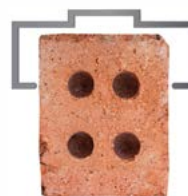

Common Applications of Doorframes

DYNABOLT
FIX

BRICK AND
BLOCKWORK

STUD WALLS

CAST IN

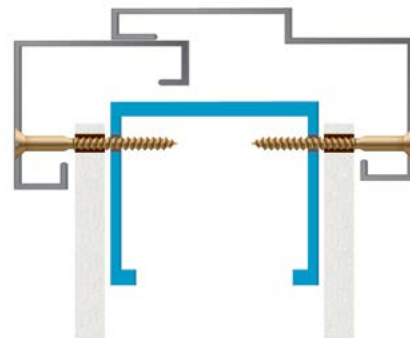

SPLIT METAL DOORFRAMES

Split metal doorframes are a popular choice when installing into existing openings. Split metal doorframes can be installed into Brick, Block, Stud and Concrete walls.

We carry a large range of popular sizes in stock and can also produce custom sizes extremely quickly.

Specifications

- Our standard Split Metal Doorframes are manufactured to suit 35-38mm thick doors.
- They come complete with Welded 100x75x1.6mm Z/P hinges and a standard striker plate set at 1 meter from floor level.
- Any custom Splits can be easily manufactured in our Commercial division

AN ORDER OF SPLITS READY TO BE DELIVERED

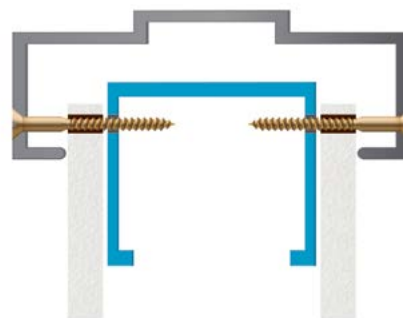

10-BEND KNOCK DOWN METAL DOORFRAMES

Ausmet's 10-Bend Knock Down metal doorframes have an innovative screw fixed mitre. This method of screw fixing the mitre results a neat and accurate finish.

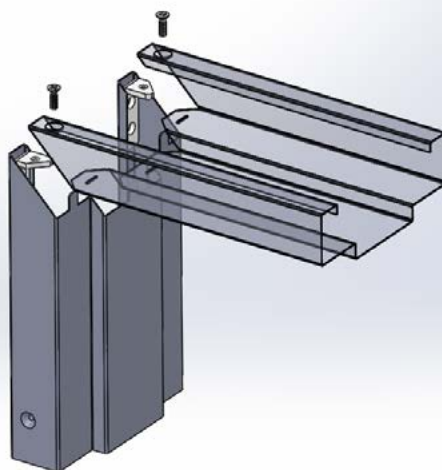

We carry a large range of popular sizes in stock and can also produce custom sizes extremely quickly.

Specifications

- Our standard 10-Bend Knock Down metal doorframes are manufactured to suit 35-38mm thick doors. They come complete with Welded 100x75x1.6mm Z/P hinges and a standard striker plate set at 1 meter from floor level.
- Our 10-Bend Knock Down's are available in four different throat sizes, being 89mm, 95mm, 102mm and 114mm
- Any custom Knock Downs can be easily manufactured in our Commercial division

SCREW FIXED MITRE

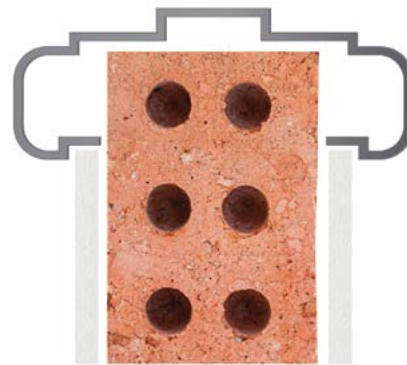

RESIDENTIAL DOORFRAMES FOR DRYWALL

Lining clay brick with plasterboard in lieu of hardwall plaster is fast becoming a popular alternative in Western Australia's residential construction market.

Specifications

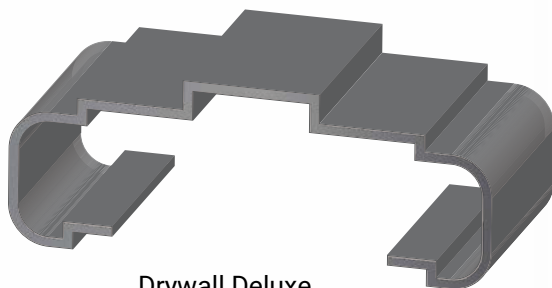

Our Drywall design incorporates an additional bend which creates a small recess. This recess allows the plasterboard to sit neatly into the doorframe.

- Ausmet offer two profiles of Drywall metal doorframes, being Modern and Deluxe.
- Hinged and Slider applications are available for both profiles.
